

WE ARE HERE FOR YOU!

GLA and its affiliates, Clear Creek Associates, Daniel B. Stephens & Associates, Geo-Logic Peru, Kunkel Engineering, and RMC Geosciences understand that our clients provide essential services that are critical to protecting the environment, keeping drinking water safe, developing key infrastructure and managing waste and natural resources. GLA is here to help you during this unprecedented time.

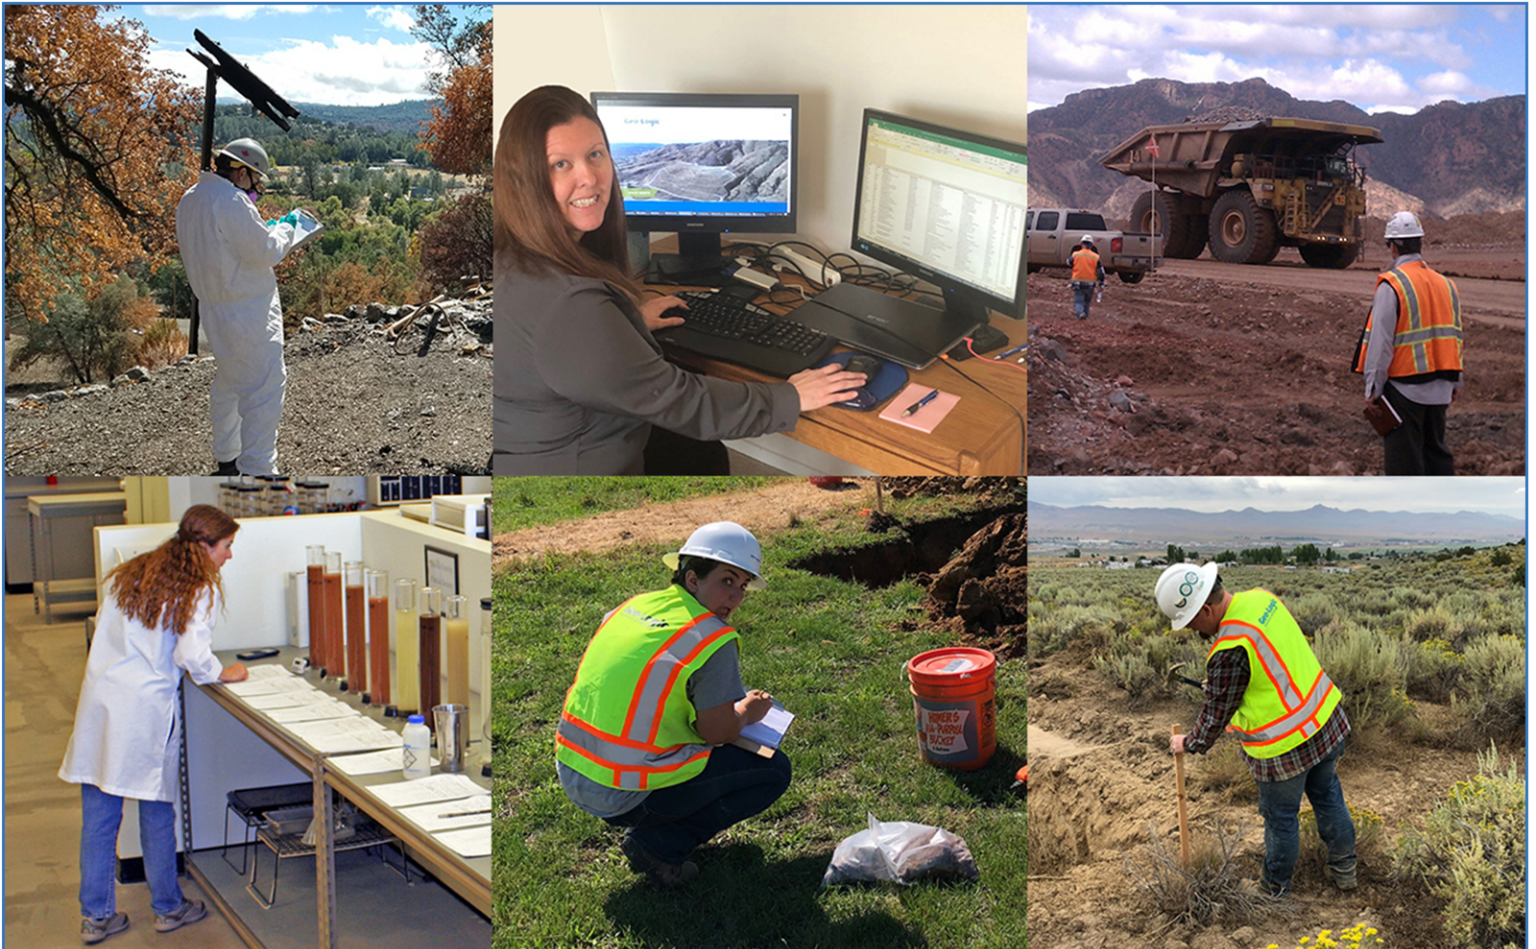

Like all of you, we have been following developments concerning the COVID-19 pandemic. Our top priority continues to be the health and well-being of our employees, our clients and our communities. To continue to help you, we have put measures in place to safeguard our workforce, mitigate risks to our team and clients, and promote flexible work arrangements, wherever possible.

Our company includes 26 offices throughout the United States and Peru, and as a result, systems were already in place to allow our employees to connect between offices, and in most cases, no additional changes were required to allow further distribution of our workforce into their homes. New response measures have been put in place to respond to the specific circumstances of COVID-19, and these measures are designed to ensure the services we provide to our clients are uninterrupted so that you can continue to meet your operational goals, maintain regulatory compliance, and serve your communities.

Our staff will be reaching out to ensure that our clients' project needs are met, and to integrate specific concerns and pandemic-related procedures into our projects. In this way, we aim to reduce our clients' concerns about worker and community health and safety, project schedule, and budget.

On behalf of the 250 men and women of GLA, we remain committed to the safety, security, and well-being of our people, our clients, our communities, and the environment.

Please contact Nicole Sweetland at nsweetland@geo-logic.com or (805) 681-2984 if you would like further information about our COVID-19 response plan.
