

## **LOCATION: SCOTTSDALE OR TUCSON, ARIZONA**

### **TYPE: FULL TIME**

Clear Creek Associates, a Geo-Logic Associates (GLA) company, is seeking a qualified and motivated staff person to join our technical team. CLEAR CREEK ASSOCIATES is a water resources and environmental consulting firm providing comprehensive services in hydrogeologic and groundwater sciences. The firm is comprised of about 35 professionals, including hydrologists and hydrogeologists, environmental scientists, engineers, modelers, geographic information system (GIS) specialists, and field technicians. Our firm is the perfect size for individuals wanting to get involved with all aspects of a project and see them through from design to construction to operation. As a subsidiary of Geo-Logic Associates (GLA), you will have access to 250 diverse professionals in 28 offices in the U.S. and Peru. There is room to grow personally, professionally, and geographically within our organization.

### **WHY WE REALLY WANT YOU IN THIS JOB**

By joining our team, you will be putting your bachelor's (or master's) degree in geology to work on a wide range of projects including water resources design and management, soil and groundwater remediation, and mining industry support. This can happen if:

- You are knowledgeable and excited about geology and/or hydrogeology, including structural analysis, field mapping, aquifer systems and groundwater flow analysis, drilling and geologic logging, surface and downhole geophysics, and well design and construction.
- You are willing to travel to remote job sites in the southwestern United States, primarily in Arizona, but also adjacent states. Travel opportunities will vary, but could include more remote field assignments for multiple weeks at a time or daily site visits to project sites.
- You are organized, have strong attention to detail, and a demonstrated aptitude for problem-solving, analytical thinking, and the ability to work independently.
- You have the ability to work with a team of geologists, hydrogeologists, and engineers, on projects in multiple states.
- You are experienced and effective in your written and verbal communication and are comfortable addressing technical (e.g., other geologists, engineers) or layperson audiences.
- You have experience with ArcGIS, or similar software for managing geospatial data.
- You are interested and intend to pursue professional registration as a geologist-in-training (G.I.T.) within two years and a licensed professional geologist (RG) within five years.

A B.A. or B.S. degree in geology, engineering, environmental science, or related scientific field is required.

### **MORE ABOUT THIS OPPORTUNITY**

You will work with a team of highly talented individuals on a variety of small to large environmental and water resource projects. Typical tasks for a staff-level hydrogeologist include:

- Working with the project team to compile necessary geologic and hydrogeologic data, including lithologic logging, water level measurements, aquifer testing data, etc.
- Observing and documenting borehole drilling operations and working with drilling contractors.

- Performing construction observation, as-built documentation, and preparation of record drawings.
- Collecting field data and troubleshooting system and equipment operation.
- Preparing reports—technical writing ability is extremely important and samples of writing may be requested during interviews.
- Working on project teams with professionals who are motivated to provide high-level services to our clients.

This position may require travel, and will include evening and/or weekend work, and requires the ability to lift and carry up to 50 lbs. and work in adverse weather conditions, including high temperatures. This position also requires that the potential employee pass a pre-employment drug screen. Potential employees must also undergo a pre-employment physical and must possess and maintain a driving record acceptable to our insurer. Candidate must be eligible to work in the United States.

GLA offers a comprehensive benefits package including health insurance and 401(k) retirement plan. GLA is an Equal Opportunity Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, sexual orientation, gender identity, disability and protected veterans status or any other characteristic protected by law. For consideration please respond by sending resume and cover letter to: Maria Robles, Human Resources: [employment@geo-logic.com](mailto:employment@geo-logic.com) with a copy to [info@clearcreekassociates.com](mailto:info@clearcreekassociates.com).
